---

Dynamic backend developer with a hunger for learning and a fervent drive to innovate. Committed to developing impactful solutions and pushing the boundaries. I see myself as a magician who manipulates the backend to create magic. Enjoys the thrill of problem solving and transforming abstract concepts into functional realities.

## SKILLS

---

- Java
- NodeJS
- ExpressJS
- JavaScript
- REST
- React
- MongoDB
- VCS (Git)

## PROJECTS

---

### Blog App

- An engaging platform for expressive and seamless content creation.
- Provides intuitive features for users to compose and publish captivating blog posts.
- Tech Stack: MERN

### Movie Rating App

- Developed an intuitive platform that allows users to effortlessly search and view movies.
- Features an extensive library of movies, complete with detailed descriptions, trailers, and ratings.
- Tech Stack: MERN

## ACHIEVEMENTS

---

- Conducted an engaging hands on session on prompt engineering and gamification for an audience of 60 members, sharing valuable insights about the concepts.
- Participated in hackathons like K'hacks and Innothon, gaining valuable experience and learning new skills in a collaborative environment.
